SUMMARY

Motivated Computer Science graduate with experience in web development, responsive design, and user interface design.Skilled in building interactive web applications and creating user-centric digital experiences. Passionate about problem-solving, learning new technologies, and delivering efficient digital solutions.

SKILLS

- Programming - Python, Java
- Frontend & Backend - HTML5, CSS3, React.js, Angular, Tailwind CSS, JavaScript, TypeScript, Responsive Web Design, Web Accessibility, Node.js, Spring Boot
- Database & Developer Tools - SQL, PostgreSQL, Git, GitHub, Postman, VS Code
- UI/UX Design - User Research, User Flows, Wireframing, Prototyping, UI Design, UX Design, Visual Design, Typography, Design Systems, Figma

EXPERIENCE

UI/UX Designer **Dec 2025 - Jan 2026**

Cognifyz Technologies

- Designed web and mobile application interfaces in Figma by creating user flows, wireframes, and high-fidelity prototypes aligned with project requirements.
- Created reusable design components, documented design specifications, and collaborated with developers to ensure accurate implementation and consistent user interfaces.

Web Developer **Jan 2026 - Apr 2026**

Codealpha Tech LLP

- Built responsive web applications and interactive user interfaces using HTML5, CSS3, JavaScript, and React, ensuring compatibility across different devices and browsers.
- Debugged frontend issues, enhanced website functionality, and collaborated using Git and GitHub for version control.

PROJECTS

A DEEP LEARNING-BASED CLINICAL DECISION SUPPORT SYSTEM FOR CERVICAL CANCER PREDICTION **May 2026**

- Developed a deep learning-based clinical decision support system for cervical cancer prediction using image preprocessing, feature extraction, and predictive modeling.
- Designed and integrated a web-based application using Python, Flask, MySQL, HTML, CSS, and Bootstrap to enable efficient data management, model prediction, and user interaction.

FLOWBOARD PROJECT MANAGER **June 2026**

- Developed a project management web application that enables users to create projects, organize tasks, assign team members, and monitor project progress through an intuitive interface.
- Implemented task categorization, priority management, due dates, search functionality, and real-time status updates to streamline project planning and collaboration.

EDUCATION

IFET COLLEGE OF ENGINEERING **2022 - 2026**

Bachelor of Engineering in Computer Science and Engineering

Government Model Girls Higher Secondary School **2021 - 2022**

Computer Science and Mathematics

CERTIFICATIONS

- Research Paper Presentation – IEEE ICMSCI 2026
- Prompt Engineering: Shaping Better AI Responses - IBM SkillsBuild
- UI/UX Design Masterclass - NoviTech R&D Private Limited
- Intro to Graphic Design with Photoshop - Great Learning
- Create and Design Digital Products using Canva - Coursera
- Python App using ChatGPT - Great Learning
